

Developer Call Notes

Development Call Notes

The Shibboleth developers hold regular calls focussing on development of the Shibboleth software. The calls are open to any interested parties and members of the community are welcome to attend.

Time: The first and third Fridays of each month at 10:00am EST/EDT (call time floats around in other time zones depending on whether DST changes happen on the US schedule or not).

Call details, and a connection link, are announced to the dev list and are included in the agenda page for each meeting.

Notes from previous calls are available below.
