

Productionalization

Shibboleth Productionalization

Moving any service in to production requires the consideration of many environment and political aspects. The topics here attempt to discuss these aspects and provide guidance. More basic configuration information is available in the [configuration section](#).

Identity Provider (IdP)

- [Tuning your Java Virtual Machine](#)
- [Managing Configuration Files](#)
- [Managing Log Files](#)
- [Clustering](#)
- [IdP-Initiated SSO](#)
- [Load Testing](#)
- [Upgrades from 1.3](#)
- [Commercial Interoperability](#)
- [Cookie Usage](#)
- [Other tips](#)

Native Service Provider (SP)

- [Clustering](#)
- [Rotate Log Files](#)
- [Header Spoofing Concerns](#)
- [Upgrades from 1.3](#)
- [Commercial Interoperability](#)
- [Service Provider behind a Reverse Proxy](#)
- [Cookie Usage](#)

Discovery Service (DS)

Federation Operations

- [Metadata Correctness](#)
