

2019-05-17

Shibboleth Developer's Meeting, 2019-05-17

Call Administrivia

09:00 Central US / 10:00 Eastern US / 15:00 UK / 17:00 FI

Calls are normally the 1st and 3rd Fridays of each month. Next call would be Friday 2019-06-07. Any reason to deviate from this?

60 to 90 minute call window.

Call Details

This week's call will use the Zoom system at GU, see [ZoomGU](#) for access info.

AGENDA

- [Ian Young](#): GraalVM: "production"; worth any attention yet? **JPAR-136** - Track GraalVM as a deployment environment
- [Ian Young](#): lists of supported vs. tested [Java distributions](#)
- [Scott Cantor](#): Configuration style for new attribute mappings – many small non-XML files or few big XML files?
 - <https://git.shibboleth.net/view/?p=java-identity-provider.git;a=tree;f=idp-conf/src/main/resources/attributes;h=bb61be01693a743cbaeab2517758597319912a5e;hb=HEAD>

Add items for discussion here

Attendees:

Brent

- Thinking of approaching the Velocity people about taking over the Spring MVC support - any fundamental objections? They may scream "No!" but feel obligated to try.

Daniel

Henri

- Started integrating OIDC RP metadata resolution to MetadataResolverEngine
 - The RP metadata will probably be expressed via custom schema extension to the RoleDescriptor element
 - First version will be implemented to the OIDC plugin (i.e. on top of v3.4 codebase)

Ian

Marvin

Phil

- Probably finished enough of the CSRF investigation to try out a PoC for adding anti-csrf tokens to views.
 - Also, adding a PoC PredicateAccessControl using a shared secret. Usable by the RESTful admin APIs.
- Continue help on OIDC claims in transcoders etc. where required.

Rod

- Attribute Value cleanup
- Attribute export from Data Connectors
- Watching windows tests

- Question: Is there a fully working eclipse environment for J11 yet?

Scott

- Wrapping up attribute mapping work
 - Backward compatibility via resolver / AttributeEncoders
 - OIDC claim support TBD
- Starting some thinking about proxying design vis a vis authentication flow design

Tom

- AWS : considering whether to create/manage an AMI or attach an EBS containing Maven and the Javas to-be-tested, leaning to EBS
