

2014-11-21

Shibboleth Developer's Meeting, November 21, 2014

Call Administrivia

10:00 Central US / 11:00 Eastern US / 16:00 UK

Next call is next Friday. Any reason not to meet ?

OR

Normal schedule is to skip next Friday as it's the last Friday of the month. Any reason to vary that?

60 to 90 minute call window.

Call Details

This week's call will use the Lync system at OSU. To participate, call:

- +1 (614) 688-1800 (please use if possible)
- +1 (800) 678-6114 (use only if you're charged for the 614 number)

The Conference ID is: 738127#

International participants should be able to access the 800 number without charge through Skype.

Attendees:

Brent

Daniel

Ian

Marvin

Completed CAS protocol testing in our dev environment. Mostly this involved testing group-based RP configuration activation, but it works like I'd hoped and I'm pleased. I may refactor some of the trust-based proxy components based on Brent's recent commits on OSJ-83 since the use case seems similar. Will research next week.

Rod

On site @ a customer. May not be able to get to the meeting.
Nothing to report that hasn't been discussed on list.

Scott

Finished up X.509 c14n action, which led to parsing bug and the cryptacular fix, seems to be closed now, presume we'll want to ship with 1.0?

Added runtime exception handling with logging to flows

Added a ScriptedAction, so a custom flow could be done without Java coding

Testing consent/tou code

- Fixed simultaneous storage against session and persistent cookies
- Making some flow adjustments here and there after talking with Tom

Lot of final pass config reorg'ing to remove bean processors, factoring files

Working on full i18n of templates

Tom

Consent unit tests and cleanup
