

2018-01-05

Shibboleth Developer's Meeting, 2018-01-05

Call Administrivia

10:00 Central US / 11:00 Eastern US / 16:00 UK

Calls are normally the 1st and 3rd Fridays of each month. Next call would be Friday 2018-01-18. Any reason to deviate from this?

60 to 90 minute call window.

Call Details

This week's call will use the Zoom system at GU, see [ZoomGU](#) for access info.

AGENDA

1. Conditionalizing files: there's probably only one file to remove
2. ROBOT attack
3. Why **do** we have an exposed type for HTTP metadata with no backup? Worth deprecating the type?
4. SP 3.0, what does this upgrade look like? How does an RPM-based package upgrade itself incompatibly?
5. What does the process to 3.last and 4.0 look like in terms of deprecations? (Ian)

Attendees:

Brent

Daniel

Ian

Marvin

Rod

- [SSPCPP-756](#) - Bring Dynamic Metadata Provider up to functional equivalence to IdP one CLOSED
- Moving on to SP V3 odds and ends and documentation.

Scott

- xml-sec 2.0 release imminent, will get a RC out next week
- [IDP-1242](#) - Flow bean import issues when defining child flows externally CLOSED

Tom

- Still working on Windows Jetty 9.4 testing
 - Using Java 9 to run the tests
 - Where are we with the Java version detection code for tests ?
 - OIDC plugin
- Nexus upgrades, more 3.x than 2.x
- whither Idpsearch

Other
