

# Demonstration Sites

## Shibboleth 2 Demonstration Sites

These publicly available, interactive demonstration resources are useful for learning about Shibboleth and demonstrating its use to new communities. Each relies on a functional deployment.

- **SWITCHaai:** The [Swiss Education & Research Network](#) has prepared an excellent [step-by-step demo](#) with pictures and instructions.
- **TestShib SP:** The TestShib SP and IdP may be used together to demonstrate single sign-on. Just enter <https://idp.testshib.org/idp/shibboleth> on the front page and follow along.
- **IdM Integration:** IdMi has a pre-configured Shibboleth demo available for download <http://idmintegration.com/training/>. The demo includes an IdP and two SP VMs that can be used to learn how federated authentication works without requiring the technical expertise to install Shibboleth software.
