

StaticDataConnectorPatchIdP

Configuring a Static Data Connector (Shibboleth IdP 1.3c)

The Shibboleth IdP version 1.3.1 package from Internet2 already contains the StaticDataConnector class. Users of earlier versions should consider to upgrade their installation. Users of version 1.3c can follow the instructions on this page. The connector used here was retrieved from the CVS system. See the respective mailing list message: <https://mail.internet2.edu/wws/arc/shibboleth-users/2006-01/msg00184.html> .

Patch the 1.3c Shibboleth IdP

Unpack [resolver-static.jar](#) (see attachments of the page) to `webapps/shibboleth-idp/WEB-INF/classes/`

`schemas/shibboleth-resolver-1.0.xsd` will be overwritten

`classes/edu/internet2/middleware/shibboleth/aa/attrresolv/ResolutionPlugInFactory.class` will be overwritten

`classes/edu/internet2/middleware/shibboleth/aa/attrresolv/provider/StaticDataConnector.class` will be created

Configure StaticDataConnector in `resolver.xml`

See the configuration description on the [StaticDataConnector](#) page.

Resolver test script

Copy the file `resolver-static.jar` in `$IDP_HOME/lib/`.

Edit the `resolvertest` script to prepend `resolver-static.jar` in classpath:

```
SHIB_UTIL_CLASSPATH=$SHIB_UTIL_CLASSPATH: "$IDP_HOME"  
SHIB_UTIL_CLASSPATH=./lib/resolver-static.jar: "$SHIB_UTIL_CLASSPATH"
```
